Inspiration:

The Bauhaus Movement started by Walter Gropius tends to feature simple geometric shapes like rectangles, triangles and circles, without elaborate decorations. Characterized as a combination of the Arts and Crafts movement and Modernism, it lays emphasis on function and its aim to bring art back into contact with everyday life.

The design of the Table interprets the style, colour contrast, shapes of Bauhaus Art. It is formed with four different verticals which create a balance with the horizontal members. The table is intended to enliven the room with its colours and its simple form. It serves as a utilitarian table as well as a piece of art.
