Inspiration:

The corner table is designed with an organic rhythm, constructed using one material to achieve a seamless form. The light weight of the table allows the user to move it freely around the space. The smooth undulating form and no sharp edges makes the table suitable for all locations. The dip in the center is designed optimally to place artefacts or a planter.

Inspired from the Lily flower, the design and scale of the table is optimal for purposes such that it can be used as a coffee table, high center table and corner table.
