Inspiration:

The "Skyscraper Inspired Bar Stool" is a unique and innovative piece of furniture designed to capture the essence and grandeur of skyscrapers. It takes inspiration from the tall and towering structures found in urban landscapes and incorporates their architectural elements into a functional stool.

The design of the Skyscraper Inspiration Bar Stool typically features a tall and slender structure, reminiscent of a skyscraper's verticality. A tinge of Blue depicts the reflection of the sky which is one of the prominent features in Sky scrapers & the cutouts act as windows with few lights on and off.
