Inspiration:

Game nights filled with unshakable concentration, precarious movements and joyous shouts at the toppling of a tower, make for indelible memories. And those memories are what 'The Topple Table' hopes to bring to life.

This table was designed keeping in mind a group of smiling faces surrounding the unevenly arranged, teetering blocks, held together by sheer will!

Weaving together singular block pieces in five different finishes, the table is arranged and put together to resemble a strategically played game of Jenga. Made With 14 different modules, the table is quirky enough to be a conversation starter and whimsical enough to urge you to try whip out a block and topple the tower. A puzzle piece that fits perfectly into your living space, The Topple table gives any room a piece of eccentric character that draws your eye towards it.

Premium Italian Wood Finishes by
