Inspiration:

Phool is inspired by the magnificent work of the local artisans from a small town known as Channapatna in Karnataka. The elegant silhouette of the table is a curate from different forms and shapes of the Channapatna toys, these toys add a contemporary appeal to the environment which brings character to the interiors and decor of the homes.

The Flexible forms and colors add to the versatility of these wooden carvings and shapes. The side table embraces the free-flowing traditional shape with a modern contemporary finish which would fit in various contexts in the interiors. The top of the table with concentric lines of metal inlay contrasting with the texture of malta wood with a crafty touch in a floral form elevating the visual aspects adding to the aesthetics of the product.

Premium Italian Wood Finishes by
